# MALWARE

- kohati kasutatav "pahavara", "kurivara" jms infoturbe asendustegevusega pidevalt leiutatav "pähhvara" ei väljenda sihilikkust ega võimalda kahjurprogrammi, kahjurkoodi, kahjurskripti, kahjurmakro, kahjursisu, kahjurväärtuse, kahjurseadme jt analoogiliste ala- ja sugulasliikide mõistlikke nimetusi; ohu realiseerumine tekitab kahju, mitte "pahandust", "kurja" vms;

# COOKIE

- nimetus tuleneb piparkoogitaolisest hiina õnnekoogikesest, mille sisse on küpsetatud sedel ennustusega; "kuki" on lastesläng, "küpsis" on naiivtõlge: kas siis ka "piparküpsis"?
